Ameresco Discovers Greater Efficiency Moving from Microsoft Dynamics SL to Microsoft Dynamics 365

Ameresco, Inc. is a leading cleantech integrator, renewable energy asset developer, owner, and operator. Ameresco's portfolio includes energy efficiency, infrastructure upgrades, asset sustainability, and renewable energy solutions throughout North America and Europe.

Ameresco solutions range from upgrades to the facility's energy infrastructure to the construction and operation of renewable energy plants combined with tailored financial solutions.

Ameresco needed a more robust ERP solution for their growing enterprise. While a Dynamics SL user, they were familiar with the D365 story and created the opportunity to upgrade and begin their journey toward digital transformation. Ameresco reached out to SIS for this transition based on SIS' 25 years of expertise in the construction industry.

Ameresco Challenges

Ameresco is a publicly traded company where accuracy is key. They needed better visibility and better reporting. SIS accomplished this with Power BI.

SiS

Ameresco had data in two different systems that did not interface.

Ameresco needed their enterprise under one solution to enable reporting with visibility and transparency to make better decisions.

SIS' solution to the lack of interface was to bring in Microsoft 365 and SIS Construct 365 Project Cost Management (PCM)

SIS Solution

Construction Focused Project Accounting/Job Cost functionality
Manages project budgets, revisions, change orders, subcontracts, reporting and more to give contractors much-needed ease of use, with the ability to manage projects profitably.

Ameresco Benefits

- ✓ Ameresco now has more accurate forecasting which is key for a publicly traded company.

- ✓ They now have in-time data to make quick decisions and are forward-looking at this stage.

- ✓ They see the data as it happens.

- ✓ Their new user interface (UI) lets them hire and recruit better because of its modern interface with modern tools which is expected by younger generations.
